

UV LEAK DETECTION

The DUALER

MULTI-USE 4 LED UV LIGHT & HIGH INTENSITY FLASHLIGHT

The Dualer is the latest innovation from Quest in UV leak detection. The dual purpose, dual end light comes with a UV light which utilizes four LEDs that converge into a single beam of light thanks to the uniquely designed focal lens. Unlike some other UV lights, The Dualer works with any type, any brand of UV dye. The other end is a high intensity, long reach flash light that will light even the darkest areas. All of this is controlled by one 3-way switch for ease of use.

UV light with 4 LEDs and focal lens

High intensity flash light

One switch controls both lights
